Q3 data table: county-level sample (12 counties)

County FIPS	County / State	Diabetes (%)	CHD (%)	High blood pressure (%)	Obesity (%)	COPD (%)	Overall SVI (0–1)
36005	Bronx, NY	14.8	6.3	34.6	33.7	6.4	0.9965
36047	Kings, NY	11.1	5.1	28.8	25.0	5.4	0.8874
36061	New York, NY	8.4	4.4	25.8	19.5	4.1	0.7283
36081	Queens, NY	12.2	4.9	29.8	23.8	4.6	0.8024
36085	Richmond, NY	10.1	4.8	30.3	30.0	5.2	0.5956
06037	Los Angeles, CA	11.6	4.8	28.4	26.4	4.5	0.8629
17031	Cook, IL	10.7	4.7	28.9	31.0	5.2	0.7964
48201	Harris, TX	13.2	5.5	32.9	37.1	5.5	0.9201
04013	Maricopa, AZ	9.6	5.0	28.6	30.6	5.2	0.7130
12086	Miami-Dade, FL	13.3	5.7	30.3	29.3	4.7	0.8810
28049	Hinds, MS	15.3	6.1	45.7	44.6	7.0	0.9154
01001	Autauga, AL	11.4	5.6	38.2	39.5	6.4	0.2663

Values: age-adjusted adult prevalence (%); Overall SVI is the national county percentile (0–1; higher = more vulnerable).
Source: CDC PLACES 2025; CDC/ATSDR SVI 2022 (ACS 2018–2022). Five NYC counties + seven other counties; illustrative sample.
File: data/processed/q3_county_svi.csv (12 selected rows). Published 95% confidence limits remain in the source CSV.

Q3 data table: national association summary

Condition	Spearman ρ	Valid counties (n)
Diabetes	0.751382143	2,956
Coronary heart disease (CHD)	0.6188331648	2,956
High blood pressure	0.6000084217	2,956
Obesity	0.3408422738	2,956
COPD	0.4963963318	2,956

Basis: Overall SVI (RPL_THEMES) versus age-adjusted prevalence; unweighted counties, pairwise complete observations.
Source: CDC PLACES 2025; CDC/ATSDR SVI 2022. Coefficients retain source CSV precision; associations are not causal.
File: data/processed/q3_national_summary.csv. ρ is unitless (−1 to +1); n is the valid county count.

Q4 data table: SVI themes × disease correlations

SVI theme	Diabetes	CHD	High blood pressure	Obesity	COPD
1 · Socioeconomic Status	0.785864984	0.7088121286	0.6640942516	0.3752651268	0.6154557701
2 · Household Characteristics	0.5554944015	0.4764135034	0.4421463376	0.3320598442	0.3851537805
3 · Racial and Ethnic Minority Status	0.5080556422	0.1625900971	0.3099876762	0.06911417266	-0.01640287582
4 · Housing Type and Transportation	0.4277572597	0.3545215035	0.3241019388	0.1679089598	0.2685124937

Values: Spearman ρ (unitless, −1 to +1), using age-adjusted prevalence; n = 2,956 valid counties in every cell.
Source: CDC PLACES 2025; CDC/ATSDR SVI 2022. National county theme rankings; pairwise complete, unweighted.
File: data/processed/q4_correlations.csv (n: q4_correlations_tidy.csv). Coefficients retain source CSV precision.
No missing values are filled. Correlation describes association, not causation. CHD = coronary heart disease.
